iOS Developer — AI-Assisted Software Development *January 2026 - November 2026 (11 Months)*

- Used AI-assisted tools such as Claude, Cursor, and GitHub Copilot for code analysis, development, debugging, and documentation.
- Followed a spec-driven development workflow using Spec Kit for planning and implementing features.
- Performed unit testing and automated UI testing using Maestro, providing screenshots and recordings as test evidence.

iOS Developer *January 2024 - December 2025 (2 Years)*

- Continued developing NativeCamp after transitioning from Web Developer to iOS Developer, applying knowledge of the platform's architecture and features.
- Developed iOS features using Swift and SwiftUI, including Dummy Lesson, new lesson-entry screens, new modals, and Kids UI view.
- Improved app performance and stability by fixing memory leaks, optimizing resource usage, migrating UIKit screens to SwiftUI, and updating package dependencies for compatibility with the latest iOS version.
- Investigated and fixed bugs and crashes reported by students and QA, validating fixes across multiple environments before production release.

Web Developer *July 2023 - December 2023 (6 Months)*

- Maintained and improved NativeCamp, a large-scale platform for online video lessons.
- Developed PHP backend features, including new student registration, a teacher recruitment page, and admin-side features.
- Optimized database queries, reducing page load times from 2 minutes to 20 seconds, and created database migration scripts.
- Investigated and fixed PHP errors, documented technical designs, and collaborated with developers, QA, and team leads.

Proweaver, Inc. *July 2021 - July 2023*
